This is a list of applications that are useful for those who have to manage multiple projects. It can give you a good idea about the functionality of each application, whether it is

## What's New In Dice?

Dice is a widget that can be used to throw different amount of dice at once. Has support for non-traditional many-sided dice in addition to normal 6-sided dice. Take Dice for a test and see what it can do for you! Requirements:  Opera A big dice that rolls many dice at once. When you roll the dice, it shows a series of numbers. Takes two parameters:  Number of dice that should be rolled.  A boolean to determine whether the dice should be rolled for real (true) or just for visualization (false). You can also see the answers to your rolls by clicking on the dice. You can also assign roles to each of your dice. For example, assigning a dice to role 1 will make that die roll, 1 die. You can assign different roles to each die and each die can be assigned to multiple roles. Once the dice roll, the results can be sent by the users to a friend on facebook, by email or can be displayed on the website, or on another webpage. Gives the option of displaying the

---

values in a random order or on a specific order. Also, dice roll can be hidden, the order of the values can be sorted in ascending order or descending order, and you can show or hide a specific value. Can have an optional question. Parameters:  Number of dice that should be rolled.  A boolean to determine whether the dice should be rolled for real (true) or just for visualization (false). You can also see the answers to your rolls by clicking on the dice. You can also assign roles to each of your dice. For example, assigning a dice to role 1 will make that die roll, 1 die. You can assign different roles to each die and each die can be assigned to multiple roles.
